

New county records of British spiders

P. Merrett

Institute of Terrestrial Ecology,
Furzebrook Research Station,
Wareham, Dorset BH20 5AS

Introduction

The county records which follow are additions to those shown on the distribution maps in Locket, Millidge & Merrett, *British Spiders*, Vol. III (1974) and those listed in my paper in *Bull.Br.arachnol.Soc.* 3(5): 140-141 (1975). The counties listed are those which existed before the boundary revisions of April 1974. Records for Scottish islands are listed

according to the grouping described in *British Spiders*, Vol. III, p. 132. (N.B. The island listed here is the one listed first in each group of islands in Vol. III, and is not necessarily the island where the spider was recorded). This list includes both published and unpublished records, the principal contributors of the latter being Mr P. Alderman, Dr N. P. Ashmole, Miss S. I. Baldwin, Mr R. B. Coleman, Mr J. Crocker, Dr D. J. Curtis, Dr J. Dalingwater, Mr S. Dobson, Mr D. Doogue, Mr J. B. Gray, Mr P. D. Hillyard, Mr D. Horsfield, Mr R. Jones, Mr A. Lavery, Miss C. M. Merrett, Mr D. R. Nellist, Mr J. R. Parker, Dr R. A. Preston-Mafham, Mr A. Russell-Smith, Mr C. J. Smith, Mr R. Snazell, Mr J. A. Stewart, Mr M. J. Surtees, Mr T. J. Thomas, Mr M. Towns and Dr M. B. Usher (with apologies to anyone whom I have inadvertently omitted).
