

Eighteen hundred new county records of British spiders

Introduction

The county records which follow are additions to those shown on the distribution maps in Locket, Millidge & Merrett (1974) and in subsequent published lists (Merrett, 1975, 1982, 1989). The counties listed are those which existed before the boundary revisions of April 1974. Records for islands are treated as described in Locket *et al.* (1974: 132). The nomenclature and species order is the same as that used in the check-list in the B.A.S. Handbook, which in turn follows that in Merrett, Locket & Millidge (1985) and later amendments in Merrett & Millidge (1992).

The list includes both published and unpublished records, the principal contributors of the latter being K. N. Alexander, M. C. Askins, M. Bailey, S. I. Baldwin, D. Beaumont, L. Bee, A. E. Cooper, M. B. Davidson, S. Dobson, C. Felton, A. P. Foster, A. Fowles, C. Geddes, P. R. Harvey, M. Hogg, D. Jones, D. McFerran, C. M. Merrett, J. E. D. Milner, D. R. Nellist, G. S. Oxford, F. Park, J. R. Parker, M. Pugh, H. J. Read, W. Rixom, D. Roscoe, A. G. Scott, P. A. Selden, M. E. A. Shardlow, G. C. Slawson, C. J. Smith, P. Smithers, J. D. Stanney, J. A. Stewart, M. Taylor, T. J. Thomas, A. J. White, S. A. Williams and J. Wright (with apologies to anyone whom I have

inadvertently omitted). This list is complete up to June 1994.

Although records are being collected on a 10 km square basis for the spider recording scheme, I think it is also still worthwhile to continue keeping the county records up-to-date, and I should therefore be pleased to receive any additional new county records for publication in future lists.
